Nero by Environexus is a cost-effective retrofit wireless automation solution suitable for projects that require simple scalable solutions for the connected home.

- NERO platform offers a range of innovative connected devices, such as dimmers, relays, dry contact, plug packs, security and sensors

- NERO smart app also enables users to control their home via phone and tablet, including over 3/4G for remote access control

- NERO integrates easily into push with our advanced control module that enables control of all device, remote access and even energy management dash boards.

- Plug and play retro-fit solution
